Hiring Manager

12th Floor Solutions

Oakville, ON

Dear Hiring Manager,

I am writing to express my interest in the Junior QA Specialist position at 12th Floor Solutions, as advertised. With a Bachelor of Science in Computer Science from the University of Toronto and hands-on technical experience, including a recent role as a Software Engineering Intern, I am excited about the opportunity to contribute to your team's success by ensuring the highest quality in software solutions.

My internship at the i3 Institute involved leading backend development for a portal project, where I gained substantial experience in agile methodologies and data management automation, enhancing organizational efficiency. This role honed my problem-solving skills and my ability to work collaboratively with cross-functional teams to meet project goals, which are crucial for a QA specialist.

Additionally, my role as a co-founder of Block Society, where I designed a COVID screening web application, has equipped me with a practical understanding of the software development lifecycle, from conception to deployment. This experience, combined with my technical skills in JavaScript and its frameworks (React, Express, etc) aligns well with the technologies employed at 12th Floor Solutions.

I am particularly drawn to your company's approach of closely collaborating with clients to ensure their satisfaction with the end product. I believe my strong communication skills, honed through organizing coding camps and managing partnerships at Block Society, will enable me to effectively engage with both clients and development teams.

I am eager to bring my background in software engineering and my passion for quality assurance to 12th Floor Solutions. I look forward to the opportunity to discuss how my skills and experiences align with the needs of your team. Thank you for considering my application. I am available at your convenience for an interview.

Warm regards,

Amaan Farooqi
