

Objectives for next meeting:

1. Consistent styling (everyone)
 - Everyone should make sure the components they worked on have a design that is consistent to the rest of the portal
 - **Design:** Marwan, rest of team members will follow
2. Pages:
 - Apply job - **Marwan**
 - Apply for asset posting - **Amaan**
 - Sign up for event - **Amaan**
 - Create job posting - **Taha**
 - Create asset posting - **Taha**
 - Create event posting - **Taha**
 - Track applications page for User
 - Email verification - **Tyo**
 - Applicant management page (for job or asset posting) - **Amaan**
 - Can build on top of existing view applicants page
3. Integrate authentication with Candidate an Employer Model - **Tyo**
 - Making sure only authorized people can access protected routes
4. Conditional Rendering (**Each person implements for their component**)
5. Complete filtering for jobs/assets - **Marwan**

Additional Info:

- Taha: Remove option to edit reviews from employer profile
- Amaan: Remove applicant history from dashboard
 - Also change jobid on applicants page to job name + (can maybe add some more details as well)
- State management

Unique Features

- Video Resume
- AI based coaching
- Asset posting merit system (higher/lower ranking in the feed based on reviews or rep)
